MEP Consultancy

Just like humans need a nervous system for proper functioning, buildings run on theirs called MEP (Mechanical, Electrical, and Plumbing) systems. At ROJON, we take pride in the fact that our services make buildings and structures suitable to live in by maximizing its value and enhancing its long-term benefits.

A man wearing a white hard hat and safety glasses is looking at an electrical panel. He is holding a red multimeter. The panel has various wires and components, including a digital display showing '238'.

Electrical Turnkey **Project.**

ROJON Nigeria Limited is well equipped to undertake **housing related projects** to the satisfaction of her clients. At ROJON, we prepare and build the most functional and reliable electrical related projects for our clients.

Green Buildings

A modern green building with solar panels on the roof, lush greenery, and a waterfall. Two construction workers in safety gear are reviewing blueprints in the foreground.

We design and develop environmentally responsible buildings that reduce energy consumption, lower operating costs, and promote sustainable living. Our green building approach focuses on efficient use of resources, improved indoor comfort, and long-term environmental benefits.

EDGE Expert :

Our team includes a certified EDGE Expert who provides guidance on achieving EDGE green building certification. We help clients design and optimize their projects to meet international sustainability standards while reducing energy, water, and material usage.
